DETAILED ACTION

1. The indicated allowability of claims 2-3, 7-12 and 15 is withdrawn in view of the newly discovered reference(s) to US Patent 5738908 by Rey et al. Rejections based on the newly cited reference(s) follow.

Election/Restrictions

2. Applicant's election without traverse of claims 2,3,7-12, and 15 in the reply filed on 8/25/2006 is acknowledged. Therefore claims 13-14, and 16-18 are withdrawn from consideration.

Claim Objections

3. Claim 3 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 15 includes a limitation requiring methyltrichlorosilane precursor and therefore is not limited by the genus of chloro(alkyl)silanes required by claim 3.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 2, 3, 7-12 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the silicon carbide precursor" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 10, the phrase "possibly" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

Claim 15 recites the limitation "the process gas". There is insufficient antecedent basis for this limitation in the claim. It is unclear which gas is pre-reacted in the claim.

The other dependant claims do not cure the defects of the claims from which they depend.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 2-3, 7-9 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5738908 by Rey et al.

Rey discloses a method of producing a composite using CVI into carbon fiber scrims with MTS and hydrogen, wherein the ratio of MTS to H₂ is adjusted within the range as claimed (Column 8, column 5, lines 18-25). Rey discloses providing several carbon fiber felts in sequence; therefore the first carbon felt reads on the heat resistant material with a large surface in the reaction zone between the feed and the additional carbon fiber felt and the second and subsequent carbon fiber felts read on a scrims of carbon fiber preform (Column 8, lines 37-41). Rey fails to disclose the carbon fiber felt

pre-reacts the process gas or the residual porosity is adjusted. However, the prior art and the present claims, reflected by claim 7, teach all the same process steps and thus the results obtained by applicants process must necessarily be the same as those obtained by the prior art. Therefore by contacting the process gas with a carbon fiber felt, it must necessarily result in pre-reacting the process gas and the porosity as claimed. Either 1) the applicant and the prior art have different definitions for contacting the carbon fiber felt with the process gases, or 2) the applicant is using other process steps or parameters that are not shown in the claims.

Page 4

Rey discloses a temperature of 1030°C and a pressure of 15 kPa. A *prima facie* case of obviousness exists where the claimed ranges and prior art do not overlap but are close enough that one in ordinary skill in the art would have expected them to have the same properties. *Titanium Metals Corp. of America v. Banner*, 778 .2d 775, 227 USPQ 773 (Fed. Cir. 1985). See MPEP 2144.05.

Allowable Subject Matter

8. Claims 10-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Turocy whose telephone number is (571) 272-

Application/Control Number: 10/053,211 Page 5

2940. The examiner can normally be reached on Monday-Friday 8:30-6:00, No 2nd

Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
